

## SCUBAFORCE BOARDING SUIT

Designed by Special Ops Units  
Manufactured in Germany

The new ScubaForce Tactical Boarding Suit has been designed in cooperation with the Special Operations Unit SEK (Spezial Einsatz Kommando) of the German police.

Build to resist the harshest conditions on sea or land we use an extremely light-weight yet rugged material developed and manufactured in Germany.

Developed for clandestine missions the fabric features an infrared absorbent.

To stress freedom of movement we use ultra sonic bonding seams which we reinforce with hotmelt tapes to add further strength.

The combination of a detachable hood, fleece inner lining and a neoprene collar can adapt to all weather conditions you may encounter.

Detachable waterproof pockets can be positioned individually even during the mission.

Waterproof zip on the back improves freedom of movement and prevents any obstruction in the chest area.

Waterproof transparent pockets to store visually relevant information or devices.

Large detachable thigh pockets and a waterproof front zip offer comfort and ease during long-run missions.

Removable kneepads offer maximum versatility and freedom of movement.
